

## Lean Six Sigma Yellow Belt Training

Basic training, intended for all those who want to become acquainted with the basics of process improvement, using the Lean Six Sigma methodology. We present the participants with a set of simple tools and techniques to solve process problems and with the aim of doing things more simply, to a higher standard and always to the customer's satisfaction. Participants will learn to process think and how to identify waste or inefficiency in their work.

Yellow Belt training provides clear introduction to the world of process improvement approach.

### Typical cases

- You have heard about LSS methodology and want to find out more.
- You need to create awareness about LSS in your company.
- Green Belts or Black Belts need to educate team members on LSS principles.
- Your company already uses some process improvement tools and you want to set a structured framework to it.

### You will learn to

- Understand the importance of process improvement in every organization.
- Master the basic analytical tools and creative approaches for the problem solution process.
- Learn approaches of Lean and Six Sigma.
- Acquire DMAIC methodology (methods how to manage projects).
- Learn how to support process improvement projects.
- Identify waste and inefficiencies in day to day work.
